

Aegean Terracotta Company

Our terracotta's will beautify your gardens

Aegean Terracotta Company produce high quality handmade terracotta pots with reasonable prices. Our company was established in Izmir, Turkey in 2001. Since then our business grew quickly and soon gained a reputation as a reliable, pottery supplier. We have built a new modern factory with 7000 m2 land to increase our production capacity in October 2008.

We have policy to train our workers to get competent technical skill to meet our clients' demands. We will start pottery education for the young people to make this art more popular as a carrier in January 2009 in our facility. This project is supported by Dokuz Eylul University Faculty of Fine Arts, Menemen Trade Council and Ahmet Cengiz Apprenticeship Education Centre.

We feel great honour to serve you with our skilled masters. Our main target is to offer a good price/quality ratio for our customers. We will be glad to see you in our factory to show you our products.

Please contact us to discuss your ideas or for a copy of our catalogue

Best regards

Ertan SARUHAN
